

Geometría Plana: Fórmulas de las principales áreas.

Triángulo:

$$\text{Área} = \frac{b \cdot h}{2}$$

Polígono regular:

$$\text{Área} = \frac{P \cdot ap}{2}$$

P = perímetro
ap = apotema

Paralelogramo:

$$\text{Área} = b \cdot h$$

Trapezio:

$$\text{Área} = \frac{(B + b) \cdot h}{2}$$

Círculo/circunferencia:

$$\text{Área} = \pi \cdot r^2$$

$$\text{Perímetro} = 2 \cdot \pi \cdot r$$

Rombo:

$$\text{Área} = \frac{D \cdot d}{2}$$
